

FRIDAY POSTERS

7:30 – 10:00PM

Nuha Alzaubai

The inflammation-resolving trihydroxy-docosahexaenoic acid derivative, resolvin D2 increases MCF-7 cell number *abs#229*

Ashwini Chand

Novel actions of the orphan nuclear receptor, Liver Receptor Homologue-1, in breast cancer *abs#230*

Delphine Denoyer

Establishing biomarker analysis of whole-body radiation exposure using γ -H2AX assays in patients with neuroendocrine tumours undergoing ^{177}Lu -octreotate therapy *abs#231*

Daphne Jacobs

Are irradiated tumour cells released into the circulation during a course of radiotherapy? *abs#232*

Lisa Lindqvist

Cell death induced by translation inhibition occurs via multiple mechanisms and is independent of proliferation or differentiation in the haematopoietic department *abs#233*

Hong Bin Liu

In vitro and Potential *In vivo* Effects of Azacytidine Alone and in Combination with The Pan Histone Deacetylase Inhibitor LBH589 *abs#234*

Heng-Jia (Tina) Liu

Molecular mechanisms by which the 4-phosphatase-related protein P-Rex1 acts as an oncogene in breast cancer *abs#235*

Zhanqi Liu

ADCC, CDC and binding activities of anti-Le^y antibody hu3S193 with mutated Fc *abs#236*

Carrie Lovitt

Anti-cancer drug activity in a three-dimensional breast cancer culture model *abs#237*

Geoff Macintyre

Molecular differences between benign portions of prostate glands harbouring high and low grade prostate cancer provide potential for better diagnosis prediction *abs#238*

Karen MacKenzie

Upregulation of the RNA-binding protein dyskerin increases telomerase enzyme activity in normal and malignant erythroid precursor cells *abs#239*

Way Mah

Exploring the effect of Hepatitis B virus X protein in deregulating the DNA methylation profile of Hepatocellular Carcinoma *abs#240*

Jordane Malaterre

Investigating the c-Myb proto-oncogene in intestinal stem cell function and tumourigenesis *abs#241*

Duthika Mallawaarachy

The phosphoinositide 3-kinase inhibitor LY294002, decreases aminoacyl-tRNA synthetases, chaperones and glycolytic enzymes in human HT-29 colorectal cancer cells *abs#242*

Michelle Maritz

Potent and specific anti-proliferative effects following the repression of telomerase components in immortal and tumorigenic cells *abs#243*

Claire Martin

The polarity protein Scribble mediates tight junction formation in MCF10A cells via an Erk-Fra1-Zeb-Crb3-dependent pathway *abs#244*

Olga Martin

γ -H2AX as a biomarker of individual radiation response *abs#245*

Samar Masoumi Moghaddam

Low-dose paclitaxel is highly active in suppressing malignant ascites formation in OVCAR-3 tumor bearing mice *abs#246*

Sam Mattiske

miR-155 and its target ZNF652 drive an invasive phenotype in breast cancer cells *abs#247*

Shelli McAlpine

Macrocyclic peptides: the perfect tools to explore protein function *abs#248*

Amy McCart Reed

Abrogated cell-cell adhesion in the phenotypic drift from ductal to lobular breast cancer types. *abs#249*

Scott Mead

The clinical application of next generation sequencing technology in directing targeted cancer therapies *abs#250*

Sunali Mehta

Towards improving clinical decisions for colon cancer patients: A step closer to personalised medicine *abs#251*

Agnes Mendomo

Phosphotyrosine profiling to define new therapeutic targets in infant MLL *abs#252*

Nicole Messina

STAT1 independent cytokine responses in the immunosurveillance of tumours *abs#253*

Shiloh Middlemiss

Small molecule inhibitors of MLL-rearranged leukemia: towards targeted therapy *abs#254*

Branka Mijatov (Vojvodic)

NF κ B signaling pathway plays a role in the resistance of patient derived primary melanomas treated with BRAF inhibitors *abs#255*

Ameet Mishra

Neuroendocrine and inflammatory modulation of breast cancer *abs#256*

Dessislava Mladenova

Sulindac exerts dynamic control over NF κ B signalling in colorectal cancer cells. *abs#257*

Tim Molloy

Identification of miRNAs as potential mediators of radiotherapy resistance in breast cancer *abs#258*

Donya Moradi Manesh

Molecular determinants of T-cell acute lymphoblastic leukaemia sensitivity to the pre-prodrug PR-104 *abs#259*

Leah Morenos

Evaluation of RNA extraction methods and microRNA expression analysis in patient bone marrow aspirate slides *abs#260*

Adnan Nagrial

Individualised Molecular Pancreatic Cancer Therapy: A Translational Clinical Trial *abs#261*

Radhika Nair

Oncogene cooperation of *HER2* and *cMYC* in breast cancer *abs#262*

Alvin Ng

Modelling osteosarcoma subtypes using Cre:LoxP and lineage restricted transgenic shRNA *in vivo abs#263*

Akira Nguyen

Identification & characterisation of EMT-regulatory miRNAs in mammary development and carcinogenesis abs#264

Paul Nguyen

Understanding the role of epithelial Stat3 activation during chronic inflammation and cancer *abs#265*

Marina Pajic

Using integrative genome analysis to design and test individualized treatment strategies in preclinical models of pancreatic cancer *abs#266*

Ann-Marie Patch

Integrated characterisation of recurrent somatic structural rearrangements and copy number aberration in Pancreatic and Ovarian Cancer *abs#267*

Walter Pfister

Antioxidant N-acetylcysteine inhibits cancer-induced osteolysis in a mouse model of breast-to-bone metastasis *abs#268*

Yuwei Phua

Identification and functional characterisation of miRNAs controlling mammary development *abs#269*

Vinochani Pillay

Targeting mutant K-Ras with novel siRNA-antibody conjugates for the treatment of colorectal cancer *abs#270*

Cletus Pinto

Epithelial Mesenchymal Plasticity associated loss of EpCAM in Breast Cancer - A Functional Genomics Approach *abs#271*

Fiona Pixley

Targeting CSF-1-induced macrophage migration to inhibit tumour invasion and metastasis *abs#272*

Prue Plummer

A Novel Small RNA Pathway for the Regulation of Bone Marrow Mediated Tumour Angiogenesis *abs#273*

Pamela Pollock

FGFR inhibition results in a novel mechanism of cell death in endometrial cancer cells *abs#274*

Cathy Popadiuk

Activation of oncogenic ribosomal gene transcription requires Pygopus-dependent Histone H4 acetylation at the rDNA promoter *abs#275*

Sophie Popkiss

Delineating the role of the novel fusion protein FUS-CHOP in myxoid liposarcoma *abs#276*

Normand Pouliot

Pro- and anti-metastatic functions of $\beta 3$ integrin in bone metastatic mammary tumours *abs#277*

Cristin Print

Translating the molecular signatures of breast tumours into clinically and biologically useful information *abs#278*

Paul Pumuye

New modes of pixantrone cytotoxic activity associated with nucleic acids *abs#279*

Jaclyn Quin

A novel inhibitor of ribosomal RNA gene transcription identifies coupling of Pol I transcription to multiple cell cycle checkpoints and senescence *abs#280*

Rachel Ramsdale

Activation of Receptor Tyrosine Kinases Induces Resistance to Vemurafenib in BRAF^{V600E} Melanoma Cell Lines *abs#281*

Deborah Ramsey

A cytotoxic macrocycle induces apoptosis of colon cancer cells through an Hsp90-controlled mechanism. *abs#282*

Madara Ratnadiwakara

Contribution of genetic variation within *SuprMam1* and *SuprMam2* to breast cancer susceptibility *abs#283*

David Rayner

A novel mechanism for reducing doxorubicin cardiotoxicity while maintaining anticancer activity *abs#284*

Richard Redvers

An integrated functional genomics screen implicates long non-coding RNA in breast cancer metastasis *abs#285*

Leona Rohrbeck

Regulation of the pro-apoptotic BH3-only protein BIM *abs#286*

Michael Roy

Design, synthesis, and structural characterisation of Bcl-x_L inhibitors. *abs#287*

Rachael Rutkowski

Transgenic mouse models of high grade serous ovarian cancer for preclinical analysis *abs#288*

Georgie Ryland

Genomic profiling of primary mucinous adenocarcinomas of the ovary *abs#289*

Natalie Rynkiewicz

Inositol polyphosphate 4-phosphatase II (INPP4B) is present in intermediate cells of the prostate and is variably expressed in prostate tumours *abs#290*

Anuratha Sakthianandeswaren

PHLDA1 Expression Marks the Putative Epithelial Stem Cells and Contributes to Intestinal Tumorigenesis *abs#291*

Jarrold Sandow

PUMA is phosphorylated at serine 10 to regulate apoptotic activity by signalling PUMA degradation. *abs#292*

Darren Saunders

Co-ordinated Regulation of Tumour Cell Metabolism by the Ubiquitin Ligase HACE1 *abs#293*

Jodi Saunus

Role of HER3 in brain metastases from primary breast cancer *abs#294*

Christopher Scarlett

High Expression of S100A2 Calcium-Binding Protein Defines a Metastatic Phenotype and Enhances Metastatic Potential in a Mouse Model of Pancreatic Cancer *abs#295*

Christopher Scarlett

Recruitment and Activation of Pancreatic Stellate Cells from the Bone Marrow in Pancreatic Cancer. *abs#296*

Sarah-Jane Schramm

Dynamics of protein interaction networks in melanoma: relation to clinical outcome and

BRAF/NRAS mutation status. *abs#297*

Mark Shackleton

Dynamic intra-tumoral evolution of human melanoma *abs#298*

Todd Shelper

Evaluating anticancer agents in a 3D pancreatic cancer cell culture model. *abs#299*

Han Shen

PENAO, a novel arsenic-based anti-glycolytic inhibitor, has shown promising effect on glioblastoma *in vitro* and *in vivo* *abs#300*

Julie Sheridan

Identifying molecular regulators of mammary epithelial stem and progenitor cells using RNAi *abs#301*

Skye Simpson

The Australian Familial Pancreatic Cancer Cohort (screening for pancreatic cancer in high risk Australians) *abs#302*

Fiona Simpson

EGFR endocytosis is dysregulated in human squamous cell carcinoma - a novel technique for imaging receptor internalisation in *ex vivo* human tumors. *abs#303*

Erica Sloan

Beta-blockers: a new therapeutic strategy against metastatic breast cancer *abs#304*

Pavel Sluka

The Effect of Microenvironmental Factors on the Biology of Primary Prostate Cancer Cells *in Vitro* *abs#305*

Yvonne Smith

Development of a protease resistant insulin-like growth factor binding protein 4 (IGFBP4) for treatment of primary and metastatic breast cancer *abs#306*

Yvonne Smith

Classification of mammary tumours from murine models of breast cancer with human subtypes using immunohistochemical profiling *abs#307*

Lorey Smith

Identification of Novel SCRIB Regulatory Networks in Polarized Epithelia and Models of RAS Transformation and Invasion. *abs#308*

Tiffany Somers-Edgar

A role for glucose metabolism in the response and resistance of BRAFV600E melanoma cells to vemurafenib (PLX4032) *abs#309*

Eliza Soo

Breast Cancer Epithelial Mesenchymal Plasticity - A miR-200 Story *abs#310*

Violeta Spirkoska

Optimization of *in vitro* assays to determine whether improved pharmacokinetic properties of hu3S193 mutants are due to reduced binding to the neonatal receptor (FcRn). *abs#311*

Shalini Sree Kumar

Biomarkers of resistance to anti-EGFR therapy in colorectal cancer *abs#312*

Andrew Stone

Tamoxifen-induced epigenetic silencing of oestrogen-regulated genes: a novel concept in anti-hormone resistant breast cancer. *abs#313*

Michael Stutz

Functional analysis of *TERT* locus polymorphisms which are associated with risk of breast and ovarian cancer *abs#314*

Margareta Sutija

Development of high-throughput assays to monitor histone acetylation in biochemical and

cell-based assays *abs#315*

Selina Sutton

Characterization of TRIM16 as a novel tumour suppressor in melanoma *abs#316*

Agnieszka Swierczak

Metastatic tumours promote monocyte mobilisation *abs#317*

Anthony Tachtsidis

Studying circulating and disseminated tumour cells in human breast cancer xenograft models. *abs#318*

Bee Tan

FOXP3 over-expression reduced growth of melanoma cells in vitro *abs#319*

Jian zhong (Bill) Tang

Leukaemia gene discovery via transposon mutagenesis *abs#320*

Gerard Tarulli

A subset of restricted mammary epithelial progenitors is uniquely sensitive to Wip1 loss *abs#321*

Kwang Tay

PP2A signalling is overridden by MEK/ERK activity leading to suppression of Bim and Protection of Melanoma cells from ER stress-induced apoptosis *abs#322*

Aditya Tedjasaputra

Natural Killer cell and T cell lymphoma interactions via non-classical MHC class Ib molecules *abs#323*

Wee Siang Teo

Dissecting the role of the Inhibitor of Differentiation 1 in breast cancer metastasis and characterization of pathways controlling breast cancer stem cell phenotype *abs#324*

Erik Thompson

Causality and Consequences of Epithelial Mesenchymal Plasticity in Cancer *abs#325*

Katherine Thompson-Wicking

RNA-Seq analysis leads to identification of a novel fusion protein in NUT midline carcinoma. *abs#326*

Amanda Tivnan

Inhibition of ABCC4 sensitises neuroblastoma cells to retinoic acid treatment *abs#327*

Henry To

Next Generation Sequencing of Familial Barrett's Oesophagus *abs#328*

Monique Topp

Establishment of a novel *in vivo* xenograft mouse model of human High-Grade Serous Ovarian Cancer characterized according to important prognostic features. *abs#329*

Hsin Tseng

The Cancer Testis Antigen MAGED2 Protects Human Melanoma Cells from TRAIL-Induced Apoptosis by Suppressing TRAIL-R2 Expression *abs#330*

Yan Tu

The antimicrobial peptide LL-37 inhibits migration of prostate cancer cells *abs#331*

Michal Ugarenko

Bcl-2 overexpression provides short-term resistance to doxorubicin-DNA adducts but does not protect against longer-term treatments in HL-60 cells *abs#332*

Mafaz Ullah

Response of Human endothelium to Arecoline *abs#333*

Mary Vail

An anti-EphA3 antibody, chIIIA4, targeting bone marrow-derived mesenchymal stromal attenuates tumour growth by disrupting the stromal and vascular

architecture. *abs#334*

Liz Valente

Pro-apoptotic Puma, is critical for the therapeutic effects of the p53-activating compound Nutlin3a *abs#335*

Michelle Van Sinderen

Reduced Glioblastoma multiforme tumour growth with miR-7 over-expression *abs#336*

Inge Verbrugge

Concomitant targeting of immune stimulatory and inhibitory pathways enhances the therapeutic efficacy of radiotherapy in established mammary tumours. *abs#337*

Kara Vine

Targeting Urokinase and the Transferrin Receptor with Novel, Anti- Mitotic *N*-Alkylisatin Cytotoxin Conjugates Causes Selective Cancer Cell Death and Reduces Tumor Growth *abs#338*

Matthew Wakefield

RNAseq of High Grade Serous Ovarian Tumor Xenografts *abs#340*

Xiaochun Wang

STAT3-targeted therapy on human soft tissue sarcomas *abs#341*

Noel Whitaker

Epstein-Barr virus, human papillomavirus and mouse mammary tumour virus as multiple viruses in breast cancer *abs#342*

Genevieve Whitty

Characterisation of Primary Prostate Cancer Cells in Vitro *abs#343*

Edwin Widodo

Alternatively Spliced Events in the PMC42 System of Human Breast Cancer EMT Indicate A Predominantly Mesenchymal Transcriptome *abs#344*

Nirman Wijenayake

The potential of anti-psychotics and statins as chemotherapeutics against glioblastoma *abs#345*

Alexander Wilding

Regulation of PKM2 Function in Glioblastoma *abs#346*

Sarah Wilkinson

Hedgehog signalling from the stromal microenvironment is pro-tumourigenic in prostate cancer *abs#347*

Leila Williams

Regulation of HSC self-renewal through Ap2a2 and the endocytic pathway *abs#348*

James Wilmott

Immunohistochemistry is highly sensitive and specific for the detection of V600E BRAF mutation in melanoma *abs#349*

Tomasz Wojdacz

No difference in the frequency of constitutional locus specific methylation in peripheral blood DNA from women diagnosed with breast cancer and age matched controls *abs#350*

Tomasz Wojdacz

A new workflow for methylation biomarker development - discovery and validation of 20 novel breast cancer methylation biomarkers *abs#351*

Kamil Wolyniec

E6AP ubiquitin ligase regulates cellular senescence through ARF-p53 and ROS-induced DNA damage *abs#352*

Simone Woods

Biochemical and molecular dissection of the mechanisms controlling ribosome biogenesis by the PI3K/AKT/mTOR and MYC pathways *abs#353*

David Wroblewski

Induction of Bim by the BRAF inhibitor PLX4720 sensitises human melanoma cells to the BH3 mimetic ABT-737 *abs#354*

Ania Wronski

The role of microRNAs in the conditional *Brca1* knockout mouse mammary gland *abs#355*

Mohammed Yassin

Investigating the role of asymmetric cell division in fate determination of CD8+ T cells *abs#356*

Laura Yates

Role of polarity genes in lung cancer progression *abs#357*

Sunny Ye

Discovering microRNAs controlling the breast cancer stem cell phenotype *abs#358*

Richard Young

Gene Copy Number Alterations in the CDK4 Pathway are Frequent in Invasive Primary Melanoma *abs#359*

Jerry Zhou

Correlation of surface profiles of colorectal cancer cells and lymphocytes from disaggregated tumours with blood neutrophil/lymphocyte ratios and disease stage *abs#360*

Hans Zoellner

Membrane and cytoplasmic marker exchange between osteosarcoma cells and fibroblasts via intermittent contact: Increased tumour cell diversity independent of genetic change *abs#361*
